

# Emergency Nursing Capstone Project Ideas

List of top Emergency Nursing Capstone Project Ideas:

## Patient Care and Safety Projects

1. Design colorful hand-washing signs showing the proper five steps
2. Create friendly emergency room maps for scared families
3. Make pain-rating charts using emoji faces for young patients
4. Develop quick-check safety lists for patient bed railings
5. Design bright "quiet please" signs for patient rest areas
6. Create picture guides showing proper patient lifting techniques
7. Make infection prevention posters with superhero themes
8. Design fall prevention guidelines using simple picture instructions
9. Create medicine safety cards with color-coded warning systems
10. Develop patient identification bracelet designs with safety features
11. Make emergency call button improvements for better patient access
12. Create better patient room lighting systems for nighttime care
13. Design slip-resistant floor marking systems for patient safety
14. Develop easy-read vital signs charts for patient rooms
15. Create family-friendly waiting room information display boards
16. Make emergency equipment location maps with simple symbols
17. Design patient comfort assessment tools using simple scales
18. Create wheelchair safety check guides with picture instructions
19. Develop patient bathroom safety improvement recommendations
20. Make emergency evacuation routes with kid-friendly symbols
21. Design visitor guidelines posters using simple pictures
22. Create patient meal safety check systems with symbols
23. Make medical equipment cleaning guides with step pictures
24. Design patient transfer protocols with safety checkpoints
25. Create emergency response time tracking system improvements
26. Develop patient room organization systems with color coding
27. Make medication administration safety double-check systems
28. Design patient call light response improvement plans
29. Create infection outbreak prevention protocol guides
30. Make patient privacy protection system improvements
31. Design emergency supply organization systems with labels
32. Create patient identification verification improvement methods
33. Make nurse station organization efficiency plans
34. Design quick-response emergency cart checking systems
35. Create patient monitoring alert system improvements
36. Make emergency team communication improvement plans
37. Design patient comfort item accessibility improvements
38. Create nurse walking route efficiency improvements
39. Make emergency supply restocking system improvements
40. Design patient room cleaning protocol efficiency systems

## Documentation and Technology Projects

41. Create simple electronic health record training guides
42. Design nurse-friendly computer shortcut quick reference cards
43. Make patient data entry error prevention checklists
44. Develop easy-to-use digital vital signs recording systems
45. Create medication scanning system improvement recommendations
46. Design quick computer problem-solving guides for nurses
47. Make digital patient handoff improvement systems
48. Create efficient electronic charting shortcut guides
49. Design technology training programs for new nurses
50. Make patient monitoring system alert improvements
51. Create digital nurse scheduling system improvements
52. Design emergency documentation quick-entry systems
53. Make patient data backup system improvements
54. Create nurse communication app usage guidelines
55. Design digital patient education resource systems
56. Make electronic medication verification system improvements
57. Create digital nurse assignment board systems
58. Design patient tracking system improvements
59. Make emergency alert system efficiency improvements
60. Create digital supply tracking system designs
61. Design nurse workflow app improvement recommendations
62. Make patient photo documentation system improvements
63. Create digital nurse communication improvement plans
64. Design electronic vital signs alert systems
65. Make patient care planning software improvements
66. Create digital nurse training program systems
67. Design electronic incident reporting improvements
68. Make digital patient feedback collection systems
69. Create nurse productivity tracking app designs
70. Design digital patient education tracking systems
71. Make electronic medication administration record improvements
72. Create digital nurse resource allocation systems
73. Design patient discharge planning software improvements
74. Make electronic nurse scheduling optimization systems
75. Create digital patient transport tracking systems
76. Design nurse workload management app improvements
77. Make electronic supply ordering system improvements
78. Create digital patient room assignment systems
79. Design nurse break time tracking improvements
80. Make electronic patient education documentation systems

## Emergency Response and Preparedness

81. Create color-coded emergency response team identification systems
82. Design quick-grab emergency supply bag organization methods

83. Make disaster response role cards with pictures
84. Develop emergency team communication signal improvements
85. Create rapid response team activation process improvements
86. Design emergency equipment location marking systems
87. Make disaster drill practice guide improvements
88. Create emergency response time tracking methods
89. Design emergency team assembly point marking systems
90. Make emergency supply inventory tracking improvements
91. Create rapid patient assessment checklist systems
92. Design emergency response team training programs
93. Make emergency communication system improvements
94. Create disaster supply organization methods
95. Design emergency role assignment improvement systems
96. Make emergency team coordination practice guides
97. Create disaster response training program improvements
98. Design emergency supply rotation tracking systems
99. Make emergency team performance measurement tools
100. Create rapid response protocol improvement plans
101. Design emergency equipment check system improvements
102. Make disaster preparedness training program designs
103. Create emergency response evaluation methods
104. Design rapid response team feedback systems
105. Make emergency supply usage tracking improvements
106. Create disaster response simulation program designs
107. Design emergency team communication improvement plans
108. Make emergency equipment maintenance tracking systems
109. Create rapid response protocol evaluation methods
110. Design disaster preparedness assessment tools
111. Make emergency team training evaluation systems
112. Create emergency supply organization improvement plans
113. Design rapid response time reduction methods
114. Make disaster response coordination improvement systems
115. Create emergency team performance-tracking tools
116. Design rapid response activation improvement plans
117. Make emergency equipment testing schedule systems
118. Create disaster drill evaluation method improvements
119. Design emergency response documentation systems
120. Make rapid response team assignment improvements

## Patient Education and Communication

121. Create picture-based medication instruction cards
122. Design easy-read discharge instruction improvements
123. Make patient education video presentation systems
124. Develop family communication improvement plans
125. Create multilingual patient instruction guides
126. Design patient teaching method improvement systems

127. Make family support resource guide improvements
128. Create patient feedback collection method designs
129. Design health education program improvement plans
130. Make patient instruction comprehension check systems
131. Create family resource connection improvement methods
132. Design patient education tracking system improvements
133. Make health literacy assessment tool designs
134. Create patient teaching effectiveness measurement systems
135. Design family education program improvement plans
136. Make patient communication barrier reduction methods
137. Create health education resource organization systems
138. Design patient teaching material improvement plans
139. Make family support program evaluation systems
140. Create patient education schedule improvement methods
141. Design health literacy program evaluation tools
142. Make patient teaching documentation improvement systems
143. Create family education effectiveness tracking methods
144. Design patient communication improvement program plans
145. Make health education delivery system improvements
146. Create patient teaching resource organization methods
147. Design family support coordination improvement plans
148. Make patient education outcome measurement systems
149. Create health literacy improvement program designs
150. Design patient teaching evaluation method improvements
151. Make family education resource tracking systems
152. Create patient communication assessment tool designs
153. Design health education program coordination plans
154. Make patient teaching effectiveness evaluation systems
155. Create family support program improvement methods
156. Design patient education material organization plans
157. Make health literacy resource improvement systems
158. Create patient teaching schedule optimization methods
159. Design family education delivery improvement plans
160. Make patient communication program evaluation systems

## Quality Improvement and Safety

161. Create patient safety check system improvements
162. Design medication error prevention tracking methods
163. Make infection control practice improvement plans
164. Develop fall prevention protocol enhancement systems
165. Create safety incident reporting improvement methods
166. Design quality measure tracking system improvements
167. Make patient outcome measurement improvement plans
168. Create safety education program enhancement systems
169. Design quality improvement project tracking methods
170. Make patient satisfaction measurement improvement plans

171. Create staff safety protocol enhancement systems
172. Design care quality assessment improvement methods
173. Make patient safety culture improvement plans
174. Create quality data collection system improvements
175. Design safety compliance tracking method improvements
176. Make patient care standard improvement plans
177. Create quality indicator measurement system designs
178. Design safety practice evaluation improvement methods
179. Make patient care protocol enhancement systems
180. Create quality monitoring program improvement plans
181. Design safety awareness campaign improvement systems
182. Make patient safety goal-tracking methods
183. Create quality assurance program enhancement plans
184. Design safety training program improvement systems
185. Make patient risk assessment improvement methods
186. Create quality control process enhancement plans
187. Design safety checklist improvement systems
188. Make patient safety audit method improvements
189. Create quality measure reporting system designs
190. Design safety performance tracking improvements
191. Make patient safety education program plans
192. Create quality improvement team coordination systems
193. Design safety protocol compliance tracking methods
194. Make patient care quality assessment improvements
195. Create safety incident prevention system designs
196. Design quality metric tracking improvement plans
197. Make patient safety monitoring system improvements
198. Create safety practice standardization methods
199. Design quality outcome measurement improvement systems
200. Make patient care protocol compliance plans

## Team Collaboration and Leadership

201. Create nurse team communication improvement systems
202. Design staff meeting efficiency enhancement plans
203. Make leadership skill development program improvements
204. Develop team-building exercise improvement plans
205. Create staff collaboration tool enhancement systems
206. Design nurse mentorship program improvement methods
207. Make team performance measurement system improvements
208. Create leadership training program enhancement plans
209. Design staff feedback collection system improvements
210. Make team coordination practice enhancement methods
211. Create nurse leadership development program plans
212. Design staff recognition program improvement systems
213. Make team communication tool enhancement plans
214. Create leadership evaluation system improvements

215. Design staff engagement program enhancement methods
216. Make team workflow improvement system plans
217. Create nurse collaboration program enhancement designs
218. Design staff development program improvement plans
219. Make team effectiveness measurement system improvements
220. Create leadership skill assessment tool designs
221. Design staff satisfaction measurement improvement plans
222. Make the team goal-setting program improvements
223. Create nurse motivation program enhancement systems
224. Design staff retention program improvement plans
225. Make team-building program enhancement methods
226. Create leadership coaching program improvement systems
227. Design staff support program enhancement plans
228. Make team communication assessment improvements
229. Create nurse empowerment program enhancement designs
230. Design staff development tracking system improvements
231. Make team performance evaluation program plans
232. Create leadership effectiveness measurement systems
233. Design staff engagement tracking improvement methods
234. Make team collaboration assessment tool designs
235. Create nurse recognition program improvement plans
236. Design staff mentoring program enhancement systems
237. Make team coordination improvement tracking methods
238. Create leadership development assessment tools
239. Design staff performance improvement program plans
240. Make team success measurement system improvements
