

Save Earth Project Ideas For School

Checkout the Save Earth Project Ideas For School:

Nature and Planting Projects

1. Pick a small tree and help it grow by taking care of it each day.
2. Mix seeds with soil to make a ball and place it in empty ground.
3. Make a garden full of bright flowers that brings butterflies to visit.
4. Use old boxes to grow small vegetables at your house.
5. Plant big yellow sunflowers and write down how much they grow every week.
6. Start a garden in your classroom where you can grow plants for cooking.
7. Build a box where food scraps can turn into rich soil.
8. Watch roots grow by planting beans in clear plastic cups.
9. Keep seeds from fruits you eat and plant them in your yard.
10. Use old wood to make a home for birds and put it in a tree.
11. Plant fast-growing seeds and keep notes about how they change.
12. Pick a tree near your home and promise to take care of it.
13. Make a small garden on your roof or porch using plant pots.
14. Create paths for plants to grow and see how they move toward light.
15. Plant flowers that help local bees and butterflies live better.
16. Send nice letters asking stores to add trees to their parking areas.
17. Go to a plant store to learn about different kinds of trees.
18. Grow green grass in a bottle and cut it like funny hair.
19. Draw a sign that asks people to be careful around plants.
20. Make a home for worms and see how they make soil better.
21. Paint small pots and give them to friends with plants inside.
22. Keep a special book about trees with pictures and fun facts.
23. Have a friendly contest with friends to see who can grow the best plant.
24. Take photos of plants and make them into a special book.
25. Create a picture that shows why trees are like superheroes.
26. Learn to know trees by looking at their leaves.
27. Press leaves onto paper and write what makes each one special.
28. Put potatoes in a bucket and watch them grow new plants.
29. Find fallen leaves and use them to make pretty art.
30. Write down when to water plants so they stay healthy.
31. Try growing mushrooms where it's dark and wet.
32. See who can grow the most wildflowers in your class.
33. Find baby trees near walkways and give them a better home.
34. Learn about plants that eat bugs and grow your own.
35. Build a wooden stand to hold more plants in your garden.
36. Save rain in big containers to water your plants later.
37. Keep pretty flowers in a book to make a special album.
38. Paint rocks to look like fruit and put them in your garden.
39. Help your school plant one tree for each student.
40. Make a tiny garden with small plants and pretty decorations.

Recycling and Upcycling Projects

41. Change old shirts into bags you can use at the store.
42. Use an empty milk box to make a place where birds can eat.
43. Turn old newspapers into new paper and make pretty cards.
44. Make an old jar glow with small lights inside.
45. Build a toy car using empty plastic bottles and bottle tops.
46. Turn old shoe boxes into wall holders for your stuff.
47. Make a cool case for pencils using old blue jeans.
48. Create music makers from empty cans and rubber bands.
49. Use old cereal boxes to make pretty bookmarks.
50. Build a small house for plants using clear plastic bottles.
51. Make cool stickers that remind people to refill water bottles.
52. Create pictures using bottle tops and colorful used paper.
53. Build a playhouse from big cardboard boxes.
54. Turn leftover cloth into small bags for snacks.
55. Make a fun game using cardboard and old buttons.
56. Change old socks into soft toy animals with button eyes.
57. Cut up old magazines to make a pretty picture.
58. Turn an old bike wheel into a fun swing.
59. Make key holders using plastic straws and string.
60. Plant small herbs in empty egg boxes.
61. Turn a soda bottle into a bank for saving money.
62. Build a tiny city using only things that would be thrown away.
63. Make old CDs into pretty wall decorations.
64. Use tin cans as pots for growing flowers.
65. Make a notebook using paper that wasn't used and cardboard.
66. Turn an old pan into a place where birds can wash.
67. Use old newspapers to wrap presents with your own drawings.
68. Make a pretty floor mat using old pieces of cloth.
69. Turn an old sweater into a soft bed for pets.
70. Make a glass jar glow with colored paper.
71. Use empty toilet paper rolls to hold desk items.
72. Build a picture frame using wooden sticks from ice cream.
73. Make a small money holder from juice boxes.
74. Paint old cans to hold school supplies.
75. Build a tiny robot from broken machine parts.
76. Make boats using corks and paper sails.
77. Turn old cards into a book of memories.
78. Change an old drawer into a place for books.
79. Melt broken crayons to make new rainbow ones.
80. Create a fun game about helping nature using old materials.

Energy-Saving Projects

81. Build a lamp that uses sun power to make light.
82. Make a picture that shows ways to save power each day.

83. Create a toy windmill to learn about wind power.
84. Set up a small sun-powered panel to charge things.
85. Make an oven that uses sun heat with a box and shiny paper.
86. Have a night without lights to save power at home.
87. Write down how much power your family uses each week.
88. Put special bulbs in your room that use less power.
89. Plant trees around your house to stay cool without machines.
90. Add sensors that turn lights off when no one's there.
91. Learn when to unplug things that aren't being used.
92. Make a toy that spins to show how wind makes power.
93. Build a tool that shows how hot or cold it is.
94. Use shiny things to keep your room cool naturally.
95. Make a fun game to test friends about saving power.
96. Try going one day without using power with your class.
97. Learn the best way to use heat without wasting it.
98. Put a timer on hot water to save energy.
99. Study how sun panels work and tell others about it.
100. Paint windows to keep rooms cool naturally.
101. Make a fan that runs on wind power.
102. Use old papers to block hot sun from windows.
103. Make signs that remind people to turn off lights.
104. Try using sunlight instead of turning on lamps.
105. Save rain to water plants without using machines.
106. Build a small sun-powered phone charger.
107. Make a water fountain that runs on sun power.
108. Learn which machines use the most power.
109. Put up window covers that keep heat out in summer.
110. Learn about earth heat and make a model to show how it works.
111. Use candles for light sometimes instead of lamps.
112. Draw a fun chart showing ways to save power.
113. Make a small water power system with bottles.
114. Try drying clothes outside instead of using machines.
115. Learn about houses that save power and how they work.
116. Make a list of power-saving rules for your home.
117. Build a windmill that can light up a small bulb.
118. Make a toy robot that moves in sunlight.
119. Put up small sun-powered lights in your yard.
120. Create a plan to help your family save power.

Water Conservation Projects

121. Build a system to catch rain for watering plants.
122. Make a sign for school bathrooms about saving water.
123. Try taking shorter showers to use less water.
124. Save water in a bucket while waiting for it to get hot.
125. Plan a week of water-saving activities at school.
126. Grow plants that don't need much water to live.

127. Make a water cleaner using sand and rocks.
128. Keep track of how much water you use each day.
129. Put special tips on faucets to use less water.
130. Make a funny play about saving water at home.
131. Create a tool to help people track their water use.
132. Find out how much water it takes to make things we use.
133. Use a timer when watering plants to not waste water.
134. Learn about places that don't have enough water.
135. Help your school find ways to use less water.
136. Make a system that waters plants drop by drop.
137. Write down ways to save water at home.
138. Use a sponge to clean dishes instead of running water.
139. Make a timer for showers to save water.
140. Put up signs near water faucets about saving water.
141. Make a fun quiz about water saving for friends.
142. Learn to fix dripping faucets and show others how.
143. Use a bottle to help toilets use less water.
144. Draw pictures showing how to wash hands using less water.
145. Paint water-saving tips on bathroom walls.
146. Make a book about saving water every day.
147. Remember to turn off water while brushing teeth.
148. Use rain to wash your car instead of tap water.
149. Help clean up rivers and lakes in your area.
150. Build a pretend washing machine that saves water.
151. Learn different ways to make water safe to drink.
152. Make a video about small ways to save water.
153. Study how factories use water and affect nature.
154. Start a club for kids who want to save water.
155. Have a contest to make the best water-saving poster.
156. Put in shower heads that use less water.
157. Write a story about a hero who saves water.
158. Make a calendar with water-saving tips.
159. Use a rain meter to see how much water falls.
160. Learn to wash cars using just one bucket of water.

Eco-Friendly Craft Projects

161. Make shopping bags from old clothes.
162. Create drinking straws from bamboo.
163. Make clay bowls for keeping food fresh.
164. Create pretty jewelry from old paper and wire.
165. Make cup holders from used cardboard.
166. Design wallets using leftover fabric.
167. Build paper lights to brighten your room.
168. Turn old cups into pretty plant holders.
169. Make gift bags from newspapers.
170. Paint rocks for desk decorations.

171. Create small books from old magazines.
172. Turn old shirts into soft pillows.
173. Make bookmarks from used cardboard.
174. Create wall art using old fabric and buttons.
175. Turn old toys into art pieces.
176. Build bird houses from plastic containers.
177. Make memory books from used paper.
178. Create table decorations from pine cones.
179. Make wind chimes from old keys.
180. Design shirts using safe paints.
181. Build toy cars from old wood pieces.
182. Make picture frames from used cardboard.
183. Create signs about helping nature.
184. Make dream catchers from string and feathers.
185. Turn glass bottles into candle holders.
186. Make plant markers from bottle tops.
187. Create wreaths using natural items.
188. Make floor mats from old clothes.
189. Create paper flowers for decorating.
190. Make picture collages from old magazines.
191. Turn old shoes into plant holders.
192. Make art from cardboard boxes.
193. Create shapes using old newspapers.
194. Make spinning decorations from plastic.
195. Build toy boats from wood scraps.
196. Make jewelry boxes from old containers.
197. Paint wooden spoons for kitchen art.
198. Create notice boards from used cardboard.
199. Build lights using old jars.
200. Turn plastic containers into flower vases.

Save Earth Model for School Project

1. Make a house model with cardboard that uses the sun's power.
2. Build a small world showing different places where plants and animals live.
3. Make a model that shows how we clean dirty water.
4. Build a glass container where plants grow on their own.
5. Make a spinning wheel that shows how wind makes power.
6. Build a system that cleans water to show how to save it.
7. Make a model showing how air and plants work together.
8. Create a model showing how natural waste breaks down.
9. Build a model showing how animals and plants depend on each other.
10. Make a toy car that runs on sun power.
11. Build a small glass house to show how plants grow.
12. Make a model showing how dirty water hurts lakes and rivers.
13. Design a tiny city with parks and sun-powered buildings.

14. Show how different types of power affect our Earth.
15. Make a model showing how trash dumps hurt nature.
16. Build a model showing why wet places matter in nature.
17. Make a cardboard display about using less trash.
18. Design a building that saves rain water.
19. Show how nature keeps itself healthy.
20. Make an oven that uses sun power to cook food.
21. Build a model showing the Earth's different layers.
22. Make a working model of how we get power from water.
23. Show how we sort and reuse trash.
24. Build a model of an ocean reef and why it's important.
25. Make packaging that breaks down naturally.
26. Show how we can grow food in cities.
27. Make a model showing how soil washes away.
28. Build a car that uses clean power.
29. Make a windmill to show how wind makes power.
30. Design city buses that use clean power.
31. Show how food scraps turn into dirt.
32. Build a school with sun power and gardens.
33. Show how plastic harms our world.
34. Make a system that uses rain for watering plants.
35. Create a farm that uses sun power.
36. Show how natural homes help animals live.
37. Make a model about how cutting trees changes weather.
38. Show problems with throwing away trash.
39. Show how ocean water affects weather.
40. Build a safe place for wild animals.

Save Earth Project for Kids

41. Take nature walks to learn about different plants.
42. Make a fun chart to help people remember to reuse things.
43. Create a bird feeder using peanut butter and pine cones.
44. Plant seeds and watch them turn into plants.
45. Clean up your local park with friends.
46. Make a garden with plants from your area.
47. Build a box from cardboard to sort used items.
48. Make pretty shopping bags people can use many times.
49. Race paper boats to learn about keeping water clean.
50. Start saving water by turning off faucets at home.
51. Draw pictures to teach friends about reducing, reusing, and recycling.
52. Make a box to turn food scraps into good soil.
53. Create a pencil holder using old materials.
54. Make a puppet that teaches about saving trees.
55. Have a day at school where no one uses plastic.
56. Paint kind messages about animals on rocks.
57. Make a fun game finding nature items in your neighborhood.
58. Start a worm garden to make better soil.

59. Have a lunch day where nothing gets thrown away.
60. Make up a dance about saving the Earth.
61. Make a book using pressed leaves.
62. Use old magazines to make pictures about Earth.
63. Make a costume from used items for Earth Day.
64. Start a family game to save water.
65. Make a toy car that moves without batteries.
66. Write down what you see in nature every day.
67. Make art using things from nature.
68. Write a song about helping the Earth.
69. Build a tiny house for birds.
70. Plant flowers that help bees live.
71. Make bookmarks from used paper.
72. Build a small pool for tiny animals.
73. Have a day at school with no trash.
74. Make paper birds to show peace.
75. Build a small world for endangered animals.
76. Paint pictures about saving water.
77. Pick up trash near your school with friends.
78. Make a tiny forest in a jar.
79. Write a story about keeping Earth clean.
80. Build a sand castle about clean oceans.

Save Earth Model Easy

81. Show how rain and clouds work together.
82. Make a model tree to show why trees matter.
83. Build a house that uses sun power.
84. Make a pretend volcano.
85. Build a windmill that spins.
86. Make boxes for sorting used items.
87. Show how we can save rain water.
88. Make a toy car that runs on sun power.
89. Show how animals depend on each other for food.
90. Make an Earth ball using paper.
91. Build a tiny forest with paper trees.
92. Make a small pond with rocks.
93. Show how food scraps become dirt.
94. Build a city using cardboard.
95. Make a wind catcher using straws.
96. Show how trash harms the ocean.
97. Build a small garden in pots.
98. Make a model of the air around Earth.
99. Create a tiny rainforest.
100. Design a building that helps Earth.
101. Show how Earth gets warm using plastic.
102. Make a sun-powered cooker.
103. Show how water moves in nature.

104. Grow plants in a bottle.
105. Show how sand moves around.
106. Make a model about how trees clean air.
107. Show how fish and plants can grow together.
108. Make Earth's layers using play dough.
109. Build a home for endangered animals.
110. Make good soil using worms.
111. Build something that uses wind power.
112. Make a safe place for wild animals.
113. Design clean ways to travel.
114. Make a wind power machine.
115. Build tools to watch weather.
116. Show how trash hurts oceans.
117. Grow plants using just water.
118. Make a small Earth with foam.
119. Show how we burn trash safely.
120. Compare clean and dirty water.

Save Earth Project Explanation

121. Show why using things again helps make less trash.
122. Explain how trees clean our air.
123. Tell how sun power helps Earth.
124. Show how food waste makes good soil.
125. Compare clean cars to old cars.
126. Explain how water moves in nature.
127. Show how growing food helps Earth.
128. Tell how plastic harms animals.
129. Explain why planting trees helps Earth stay cool.
130. Show how Earth's blanket of air works.
131. Explain how wet places help nature.
132. Tell how catching too many fish hurts the oceans.
133. Show how old things become new things.
134. Explain how wind makes clean power.
135. Tell how dirty air makes people sick.
136. Show why eating plants helps Earth.
137. Explain how using things again makes less trash.
138. Show how small changes help Earth.
139. Tell how saving animals helps nature.
140. Explain why keeping forests healthy matters.
141. Show how saving water prevents dry times.
142. Tell why using less power helps Earth.
143. Explain how saving paper saves trees.
144. Show how clean travel helps Earth.
145. Tell how nature fixes itself.
146. Explain why less packaging helps Earth.
147. Show how cleaning oceans helps sea life.
148. Tell why different animals matter.

149. Explain how buying smart helps Earth.
150. Show how saving food helps Earth.
151. Tell how cutting trees changes weather.
152. Explain why city parks matter.
153. Show how growing food in cities helps.
154. Tell how clean buses help Earth.
155. Explain how sorting trash helps.
156. Show how being careful while traveling helps nature.
157. Tell how weather changes affect water.
158. Explain how green houses help save nature.
159. Show how better packaging helps Earth.
160. Tell how cleaning up helps local nature.
