

Social Studies Fair Project Ideas For High School

Some useful Social Studies Fair Project Ideas:

HISTORICAL INVESTIGATIONS

1. Find out what games kids played in ancient Egypt and what toys they had.
2. Learn what foods early American settlers ate to stay alive.
3. Draw a map showing how your family moved to where they live now.
4. Compare what kids wore in 1900 to what they wear today in America.
5. Study how Native American tribes created their special art.
6. Discover why people started using money instead of swapping goods.
7. Show what schools looked like 100 years ago.
8. Find out what games kids played during the Great Depression.
9. Learn how families kept food cold before refrigerators existed.
10. Explore what medicines people used in colonial America.
11. Research how children helped their families during World War II.
12. Discover what songs people sang during the Civil Rights Movement.
13. Find out how people sent messages before telephones were invented.
14. Show how kids' chores have changed over the past 200 years.
15. Learn what sports people played in ancient Greece.
16. Discover how people celebrated birthdays in medieval times.
17. Find out what tools farmers used before they had tractors.
18. Study how people traveled before cars were invented.
19. Learn what Native American children were taught by their elders.
20. Draw a map of Underground Railroad stops in your state.
21. Research what games pioneer children played while traveling.
22. Show how people stayed warm in winter before electricity.
23. Find out what toys Victorian children played with.
24. Learn how ancient Roman children spent their school days.
25. Study what foods Vikings ate on their long boat trips.
26. Draw a map showing how the Pony Express carried mail.
27. Research what kind of music children enjoyed in colonial America.
28. Show how people saved food before cans were invented.
29. Learn what games children played in ancient China.
30. Study how Native Americans made clothes without stores.
31. Find out what castle children did for fun in medieval times.
32. Draw a map of how families traveled west on the Oregon Trail.
33. Research what ancient Maya kids learned in school.
34. Show how pioneers made their own soap at home.
35. Find out what toys children of Egyptian pharaohs played with.
36. Learn how children in ancient Greece helped their families.
37. Study what games kids played in Italy during the Renaissance.
38. Draw a map of the Silk Road and how it connected cultures.
39. Research what books children read for fun in colonial America.
40. Discover how kids in ancient Persia learned their lessons.

CULTURAL EXPLORATIONS

41. Learn how different cultures celebrate the new year today.
42. Find out what special foods families eat on holidays worldwide.
43. Draw a map showing where different languages are spoken in your city.
44. Research how weddings are celebrated in different countries.
45. Show how people greet each other in different cultures.
46. Find out what special clothing means in different celebrations.
47. Study how families eat dinner in different parts of the world.
48. Draw a map showing where different religions are practiced locally.
49. Learn how music is used in cultural ceremonies around the world.
50. Research how different cultures honor their elders today.
51. Show how people welcome new babies in different places.
52. Find out what games kids play in other countries.
53. Study how different cultures celebrate becoming adults.
54. Draw a map of where different traditional dances come from.
55. Learn what art means to different cultures around the world.
56. Research how different cultures honor their ancestors.
57. Show how people celebrate harvest time in different places.
58. Find out what stories cultures tell their children.
59. Study how families live together in different parts of the world.
60. Draw a map of where different musical instruments were invented.
61. Learn what symbols mean in different cultures.
62. Research how people celebrate big life events in different places.
63. Show how different cultures use colors in celebrations.
64. Find out what handmade crafts are made in different cultures.
65. Study how people celebrate their heroes in different places.
66. Draw a map of where different festivals happen worldwide.
67. Learn what traditional games mean in different cultures.
68. Research how people show respect in different places today.
69. Show how cultures celebrate nature in different ways.
70. Find out how music is used in different cultural events.
71. Study how families keep traditions alive today.
72. Draw a map of where different cultural foods come from.
73. Learn what clothes tell us about different cultures.
74. Research how people pray or meditate in different cultures.
75. Show how different cultures mark changing seasons.
76. Find out how art is used in cultural celebrations.
77. Study how cultures remember their history.
78. Draw a map of where famous cultural stories come from.
79. Learn what traditional sports mean in different cultures.
80. Research how people celebrate love in different cultures.

CIVIC RESPONSIBILITY

81. Study how voting helps people choose leaders.
82. Learn what taxes do to help your community grow.
83. Draw a map of where people can register to vote.

84. Research how laws protect people's rights today.
85. Show how citizens can change unfair rules peacefully.
86. Find out what jury duty means in the legal system.
87. Study how people contact their government representatives.
88. Draw a map of where public meetings take place.
89. Learn what petitions do to change local laws.
90. Research how peaceful protests work in democracy.
91. Show how citizens help during natural disasters.
92. Find out how volunteering benefits communities.
93. Study how neighborhood councils solve local issues.
94. Draw a map of where people can donate blood.
95. Learn what citizen advisory boards do.
96. Research how town halls let people share ideas.
97. Show how neighborhood clean-up days improve communities.
98. Find out how recycling programs help the environment.
99. Study how people keep neighborhoods safe.
100. Draw a map of where people can report local problems.
101. Learn what civic organizations do to help communities.
102. Research how people serve on school boards.
103. Show how citizens participate in local government meetings.
104. Find out what community service means for students.
105. Study how people help during emergencies.
106. Draw a map of where public hearings happen.
107. Learn what neighborhood associations do for communities.
108. Research how people can join city planning groups.
109. Show how citizens report road issues.
110. Find out what environmental stewardship means.
111. Study how people help maintain public spaces.
112. Draw a map of where citizens can volunteer.
113. Learn what civil rights mean in everyday life.
114. Research how people help keep parks clean.
115. Show how citizens protect wildlife.
116. Find out what community watch programs do.
117. Study how people help during weather emergencies.
118. Draw a map of where people can report safety concerns.
119. Learn what local advocacy groups do.
120. Research how people participate in community planning.

ECONOMIC UNDERSTANDING

121. Study how local stores decide what prices to charge.
122. Learn what banks do with saved money.
123. Draw a map of where different businesses operate.
124. Research how people earn money in various jobs.
125. Show how supply and demand affect store prices.
126. Find out what advertisements do to sell products.
127. Study how people create budgets.
128. Draw a map of where farmers sell their crops.

129. Learn how credit cards work in modern shopping.
130. Research how online shopping impacts local stores.
131. Show how different jobs help the community function.
132. Find out what trade means between different places.
133. Study how people save money for big purchases.
134. Draw a map of where people find jobs locally.
135. Learn how the stock market works.
136. Research how entrepreneurs start businesses.
137. Show how stores compete for customers.
138. Find out how insurance protects people financially.
139. Study how people invest for retirement.
140. Draw a map of where different services cost different amounts.
141. Learn what taxes do for local communities.
142. Research how people choose where to shop.
143. Show how workers earn different wages.
144. Find out what charitable donations do for communities.
145. Study how people make financial decisions.
146. Draw a map of where money is spent locally.
147. Learn how business loans help companies grow.
148. Research how people buy homes with mortgages.
149. Show how different careers generate income.
150. Find out what fundraising does for charities.
151. Study how people manage money wisely.
152. Draw a map of where different products come from.
153. Learn what bartering means in modern times.
154. Research how people invest in their futures.
155. Show how different jobs require different skills.
156. Find out how families plan for financial needs.
157. Study how people save for college.
158. Draw a map of economic activity in your town.
159. Learn what budgeting means for businesses.
160. Research how people make smart spending choices.

ENVIRONMENTAL AWARENESS

161. Study how recycling helps keep Earth clean.
162. Learn how pollution affects local water sources.
163. Draw a map of where renewable energy is used locally.
164. Research how climate change impacts your community.
165. Show how people save energy at home.
166. Find out how composting benefits gardens.
167. Study how trees improve air quality.
168. Draw a map of local wildlife habitats.
169. Learn what endangered species need to survive.
170. Research how plastic harms ocean life.
171. Show how people can reduce trash.
172. Find out how solar panels create clean energy.
173. Study how water pollution affects fish.

174. Draw a map of community gardens.
175. Learn what electric cars do for air quality.
176. Research how people conserve water.
177. Show how animals adapt to city life.
178. Find out how wind energy works.
179. Study how weather affects daily life.
180. Draw a map of pollution sources in cities.
181. Learn what green buildings do for the planet.
182. Research how people reduce their carbon footprint.
183. Show how plants clean the air.
184. Find out how ecosystems function.
185. Study how people protect watersheds.
186. Draw a map of environmental hazards.
187. Learn how habitat loss impacts animals.
188. Research how people help save endangered species.
189. Show how weather affects communities.
190. Find out how natural resources are used.
191. Study how people protect parks.
192. Draw a map of conservation efforts.
193. Learn what biodiversity means.
194. Research how people clean up pollution.
195. Show how different climates affect life.
196. Find out how people live sustainably.
197. Study how nature preserves are protected.
198. Draw a map of environmental education sites.
199. Learn what green technology does.
200. Research how people help local wildlife.

GLOBAL RELATIONS

201. Learn how countries work together in the United Nations.
202. Find out how buying and selling goods between countries affects local stores.
203. Mark places on a map where peace agreements have changed history.
204. Study how different countries help each other during big disasters.
205. Show how people moving to new countries change local communities.
206. Discover what diplomats do to help countries get along.
207. Learn how international sports events bring people from different countries together.
208. Map out places where refugees have built new lives.
209. Find out how money and supplies from richer countries help poorer nations.
210. Study how world groups work to end hunger.
211. Show how scientists from different countries share new discoveries.
212. Learn what students gain from cultural exchange programs.
213. Study how international laws protect people's rights everywhere.
214. Mark places on a map where peace agreements changed borders.
215. Find out how global health organizations help people stay healthy.
216. Learn how countries work together to explore space.
217. Show how different nations try to stop climate change.

218. Discover what students learn from global education programs.
219. Study how leaders from different countries communicate even when they speak different languages.
220. Mark locations where international businesses operate.
221. Learn how global rules protect nature.
222. Find out how countries share the oceans and their resources.
223. Show how different nations help when there are health emergencies.
224. Learn what international courts do to make sure justice is served.
225. Study how global trade rules affect small businesses.
226. Map where different countries have alliances to keep peace.
227. Find out what happens when technology is shared between nations.
228. Learn how countries work together to take care of rivers.
229. Show how different nations protect important cultural places.
230. Discover what global security means for people everywhere.
231. Study how planes, trains, and ships connect people across the world.
232. Map which countries use different types of money.
233. Learn why internet access worldwide is important.
234. Study how countries share weather data.
235. Show how different nations work to save endangered animals.
236. Find out what international art shows teach about different cultures.
237. Learn how global food programs help people in need.
238. Mark places on a map where peacekeeping missions are happening.
239. Discover what it means to be a global citizen.
240. Study how countries work together in Antarctica.

MEDIA LITERACY

241. Learn how news reports tell stories about world events.
242. Find out how social media spreads information.
243. Mark locations where different news stations operate.
244. Study how advertisements influence what people buy.
245. Show how the same story can be told in different ways.
246. Learn what fact-checking means and why it matters.
247. Study how TV shapes what people think.
248. Map out where newspapers serve different towns and cities.
249. Discover what digital literacy means for students today.
250. Find out how news stories can be affected by bias.
251. Show how different websites and apps share information.
252. Learn what responsible reporting means for journalists.
253. Study how people check if online information is true.
254. Map where big media companies operate around the world.
255. Find out who owns media companies and how that affects news.
256. Learn how reporters collect news and facts.
257. Show how older and younger people use media differently.
258. Discover what ethics mean in journalism.
259. Study how social media affects young people's views.
260. Mark places where media laws are different.
261. Learn what being a good digital citizen means.

262. Find out how people can tell if news is fake.
263. Show how different cultures use media in unique ways.
264. Study how media history teaches us about society.
265. Learn how ads target different groups of people.
266. Map where people have less access to media.
267. Find out what freedom of the press means.
268. Study how media influences what people think about big issues.
269. Show how websites and apps protect people's privacy.
270. Learn what digital footprints are and why they matter.
271. Study how media literacy helps people think smarter.
272. Mark places where information spreads quickly.
273. Find out what content creation means today.
274. Learn how media affects democracy in different countries.
275. Show how different apps share the news.
276. Discover what responsible posting on social media looks like.
277. Study how media influences what people choose to buy.
278. Map where there are big differences in digital access.
279. Learn what media manipulation is and how to recognize it.
280. Find out how people can stay safe online.

SOCIAL JUSTICE

281. Learn how people fight for equal rights.
282. Find out what discrimination means and how it happens.
283. Mark places where civil rights movements changed history.
284. Study how gender equality helps everyone.
285. Show how different groups stand up against unfair treatment.
286. Discover what social change means in different communities.
287. Learn how people work to protect disability rights.
288. Map where education is equal for all students.
289. Find out what racial justice means in society.
290. Study how unfair pay affects communities.
291. Show how groups push for important changes.
292. Learn what environmental justice means.
293. Study how people fight against unfair housing rules.
294. Map where food programs help those in need.
295. Find out what LGBTQ+ rights mean today.
296. Learn how workers fight for fair wages.
297. Show how different groups support indigenous people.
298. Discover what fair education means for everyone.
299. Study how people make sure voting is fair.
300. Map places where people have unequal healthcare.
301. Learn what language justice is and why it matters.
302. Find out how age discrimination affects people.
303. Show how different groups help immigrants.
304. Discover what religious freedom means.
305. Study how people work to end poverty.
306. Map where healthcare access is not the same for everyone.

307. Learn what digital equality means for people.
308. Find out how bias affects everyday life.
309. Show how people support women's rights.
310. Study what fair housing means for communities.
311. Learn how people protect children's rights.
312. Map where students have different learning chances.
313. Discover what economic justice means.
314. Study how job seekers face discrimination.
315. Show how people help refugees.
316. Find out what fair transportation means.
317. Learn how people fight for equal pay.
318. Map where social services help people in need.
319. Discover what restorative justice means.
320. Study how people work to create fairness in society.

FUTURE STUDIES

321. Learn how technology could change schools.
322. Find out what future cities might look like.
323. Mark where new buildings and projects are planned.
324. Study how jobs could change in the future.
325. Show how new inventions could help people.
326. Discover what future transportation might look like.
327. Learn how space travel could affect life on Earth.
328. Map where new energy sources might be used.
329. Find out what food in the future might be like.
330. Study how climate change affects future planning.
331. Show how robots could help people in everyday life.
332. Learn what future homes might look like.
333. Study how new medicines might work.
334. Mark places where future cities might grow.
335. Discover how people might communicate in new ways.
336. Learn how schools might change.
337. Show how jobs and careers might be different later.
338. Find out what entertainment might be like in the future.
339. Study how people might travel.
340. Map where future resources could come from.
341. Learn what money might look like in the future.
342. Find out how shopping could be different.
343. Show how energy sources may change.
344. Discover what future farms might be like.
345. Study how jobs could work differently.
346. Map where future populations might live.
347. Learn how students might learn in new ways.
348. Find out how clothes could change.
349. Show how sports might look different.
350. Study what art might be like later.
351. Map where new water sources might be found.

352. Learn what future transportation means.
353. Discover how homes might change.
354. Find out which jobs might no longer exist.
355. Show how recycling could improve.
356. Study how eating habits might change.
357. Mark where future cities could be built.
358. Learn what healthcare could look like.
359. Discover how life could change by 2050.

Social Studies Fair Topics for 10th Grade

1. Look at how social media changes political movements around the world.
2. Study how switching to renewable energy affects the economy.
3. Learn how past pandemics changed societies over time.
4. Explore how gentrification affects neighborhoods today.
5. Research how civil rights have changed over the years.
6. Compare school systems in different countries right now.
7. Study how cryptocurrency changes the world economy today.
8. Learn how immigration affects cultural identity.
9. Look at how climate change impacts indigenous people.
10. Study how artificial intelligence affects war today.
11. Research how water shortages affect countries' relationships.
12. Study how terrorism changed global security rules.
13. Explore how different cultures work toward gender equality.
14. Learn about the stigma around mental health in different societies.
15. Research how people practice religious tolerance in mixed communities.
16. Study how cities grow in a way that helps the environment.
17. Look at how digital privacy laws differ between countries.
18. Learn how wealth gaps affect school opportunities.
19. Research how cultural appropriation happens in today's world.
20. Study food supply problems in countries that need more resources.

Social Studies Fair Topics for 8th Grade

21. Find out how small businesses changed during recent events.
22. Learn how your town was part of important historical moments.
23. Study how Native American history shaped your state.
24. Look at how immigration changed your town over time.
25. Compare how people traveled in your area in the past and now.
26. Learn how your state government creates laws.
27. Study your town's role in the civil rights movement.
28. Explore how farming in your area has changed over time.
29. Look at how your community's recycling program helps the environment.
30. Study how local veterans contributed to military history.
31. Research how your town's economy has grown.
32. Compare old and new buildings in your area.

33. Study how newspapers covered big historical events in your town.
34. Look at how education in your town changed over time.
35. Research how the women's rights movement shaped your area.
36. Learn how local industries changed through the years.
37. Study how cultural festivals in your town have developed.
38. Explore how public health responses changed in your community.
39. Research how local groups work to protect the environment today.
40. Learn how your town's leaders handled big challenges in the past.

Social Studies Fair Topics for 7th Grade

41. Trace your family's journey and where they moved over time.
42. Study different cultural celebrations in your area.
43. Research how local weather affects people's daily activities.
44. Compare how schools work in different countries today.
45. Look at how different cultures celebrate important holidays.
46. Learn about what your local government does for your community.
47. Study traditional games played in different parts of the world.
48. See how technology changes the way people communicate today.
49. Learn about different cultural food traditions and what they mean.
50. Research how cities plan for growing populations.
51. Study how music and dance differ across cultures.
52. Compare housing styles in different parts of the world.
53. Learn how different cultures solve conflicts.
54. Study traditional arts and crafts from various cultures.
55. Research how different societies think about education.
56. Look at transportation in different countries.
57. Study how people from different cultures keep their history alive.
58. Examine how family traditions differ across cultures.
59. Learn how societies help those in need.
60. Research how countries protect the environment.

Social Studies Fair Topics for 6th Grade

61. Learn how ancient civilizations built their cities.
62. Study different kinds of governments around the world.
63. Compare traditional clothing from different cultures today.
64. Look at how people in different places handle money.
65. Research why ancient trade routes were important.
66. Study how different societies record their history.
67. Compare the ancient Olympic Games to modern ones.
68. Learn how different cultures have used math over time.
69. Research how storytelling traditions vary across cultures.
70. Study how ancient people made and used tools.
71. Compare how farming is done in different cultures today.
72. Explore ancient ways people communicated.
73. Learn how different cultures measured time in the past.
74. Study how ancient buildings were designed and built.

75. Compare different styles of art from around the world today.
76. Look at how people traveled in ancient times.
77. Research how cultures predicted the weather before modern science.
78. Study old medical practices from different parts of the world.
79. Compare how different cultures led their people.
80. Learn how ancient people passed down knowledge and skills.

Social Studies Fair Topics for 5th Grade

81. Learn how decisions are made at your school.
82. Research what different community helpers do today.
83. Compare popular games from different countries.
84. Look at how seasons change daily life.
85. Study different types of homes around the world.
86. Learn how communities solve problems together.
87. Compare birthday celebrations in different cultures.
88. Study how weather affects neighborhoods today.
89. Learn how families share meals in different places.
90. Research ways people help their neighbors.
91. Compare types of transportation in your area.
92. Look at how communities work together.
93. Study how schools teach children in different ways.
94. Learn how shopping habits differ around the world.
95. Compare playground games across cultures.
96. Study how people celebrate special moments together.
97. Learn how families spend time with each other.
98. Research ways communities stay healthy.
99. Compare how people communicate in different ways.
100. Look at how communities take care of nature.

Social Studies Fair Topics for 4th Grade

101. Study how your town has changed over time.
102. Learn what makes different communities special today.
103. Compare different jobs people have in your area.
104. Look at how holidays bring people together.
105. Study important local heroes in your community.
106. Learn how neighbors help one another.
107. Compare parks in your town and how they are used.
108. Look at how schools help neighborhoods grow.
109. Study different traditions in your community.
110. Research how changing seasons affect daily life.
111. Compare different celebrations in your town.
112. Learn how families help one another.
113. Study how animals help in your community.
114. Look at how communities stay safe together.
115. Compare different services available in your area.
116. Study how weather impacts daily activities.

117. Learn how people grow food together in a community.
118. Research how people travel in your area.
119. Compare the roles of different helpers in your town.
120. Look at how communities make and follow rules.

Social Studies Fair Topics for 3rd Grade

121. Study what makes families special today.
122. Learn how children help at home.
123. Compare different types of homes in your area.
124. Look at how people work together each day.
125. Study ways to be a good neighbor.
126. Learn how schools help kids learn.
127. Compare different family traditions.
128. Look at how communities celebrate together.
129. Study what makes a good citizen.
130. Learn how families have fun together.
131. Compare ways people help others.
132. Study how families save money.
133. Learn how children learn new things.
134. Research what makes a great friend.
135. Compare different community helpers.
136. Look at how families make choices together.
137. Study how to keep neighborhoods clean.
138. Learn how families share responsibilities.
139. Compare different ways to be kind.
140. Look at how kids can help their communities.
