Best Project Ideas

100 Law Project Ideas 2026 — Detailed Topics for Students

OCTOBER 29, 2025 | JOHN DEAR

This article presents 100 practical, student-friendly law project ideas written in clear, usable format. Each idea includes a short title, a concise explanation of what the project is about, suggested methodology (how to carry it out), and an expected deliverable (what you can submit).

The list is grouped by topic to help you choose according to your area of interest. Use these ideas as a starting point — you may adapt the scope, jurisdiction, or

depth to fit a class assignment, seminar, dissertation, moot problem, or practical clinic.

┌─────────────────────────────┐

└─────────────────────────────┘

How to choose and use these ideas (short guide for students)

1. **Match the scope to your timeline.** Short coursework projects need limited primary research and clear deliverables (case summaries, annotated bibliographies). Longer projects can include empirical work (surveys, interviews), comparative analysis, or drafting model legislation.
2. **Select a jurisdiction.** Many topics become manageable when you fix a jurisdiction (your country/state) and a time frame (e.g., laws as they existed in 2024–2025).
3. **Methodology options.** Typical methods include doctrinal/legal research (statute and case law analysis), empirical research (surveys, interviews), comparative analysis (compare two or more jurisdictions), drafting (policies, model laws), and clinical/legal aid projects (community outreach, impact assessments).
4. **Ethics and permissions.** For empirical work involving people, obtain required permissions or institutional review board (IRB) approval. Maintain confidentiality and informed consent.
5. **Deliverables.** Possible deliverables: research paper (4,000–10,000 words), policy brief, annotated statute, model draft law, litigation strategy, training module, dataset with analysis, or presentation with slides and a bibliography.

100 Law Project Ideas 2026 — Detailed Topics for Law Students

Constitutional & Administrative Law (1–10)

1. **Judicial Review in Practice: Case Study of Landmark Rulings**
   Aim: Analyse the application of judicial review in a chosen jurisdiction.
   Method: Select 4–6 landmark cases, summarize facts, reasoning, and impact; compare with constitutional text.
   Deliverable: Analytical paper with case law summaries and critical commentary.

2. **Separation of Powers: Boundaries Between Legislature, Executive, and Judiciary**
   Aim: Map practical tensions in separation-of-powers in recent crises or legislation.
   Method: Doctrinal analysis + news/public documents; interview a legal scholar if possible.
   Deliverable: Report with recommendations for clearer institutional boundaries.

3. **Administrative Discretion and Human Rights: An Evaluation**
   Aim: Examine how administrative discretion affects individual rights.
   Method: Use statutory examples and administrative decisions; include a small empirical survey of affected people or NGOs.
   Deliverable: Paper and policy brief suggesting safeguards.

4. **Constitutional Amendments: Comparative Study of Procedures and Safeguards**
   Aim: Compare amendment procedures in two or three countries.
   Method: Comparative legal analysis focusing on thresholds, referendum requirements, and judicial review.
   Deliverable: Comparative table and a 5,000-word essay with recommendations.

5. **Public Interest Litigation (PIL): Effectiveness and Limitations**
   Aim: Evaluate PIL's role in social change.
   Method: Case studies of successful and unsuccessful PILs; interviews with public interest lawyers.
   Deliverable: Critical assessment with lessons for filing strategies.

6. **Right to Information Laws: Access, Exceptions, and Impact**
   Aim: Assess how RTI laws work in practice.
   Method: Test requests to public bodies (if permitted), document response times and exemptions.
   Deliverable: Field report with examples and reform suggestions.

7. **Federalism and Resource Distribution: Legal Mechanisms and Conflicts**

   Aim: Study legal frameworks governing fiscal and resource sharing.

   Method: Doctrinal study of statutes and intergovernmental agreements; include recent disputes.

   Deliverable: Policy paper with model formula or recommendations.

8. **Emergency Powers and Rule of Law: A Post-Crisis Review**

   Aim: Critically examine emergency measures during a recent crisis (pandemic, unrest).

   Method: Timeline of measures, legal basis, proportionality analysis.

   Deliverable: Analytical paper with checklist for lawful emergency responses.

9. **Administrative Tribunals vs. Ordinary Courts: Access to Justice**

   Aim: Compare effectiveness and fairness of tribunals and courts.

   Method: Caseflow statistics (if available), user interviews, doctrinal comparison.

   Deliverable: Comparative evaluation with procedural reform proposals.

10. **Transparency in Government Contracts: Legal Controls Against Corruption**

    Aim: Study legal instruments that regulate procurement transparency.

    Method: Analyze procurement laws, upset decisions, and public audits; optional FOIA requests.

    Deliverable: Report including a model transparency clause.

Criminal Law & Procedure (11–20)

11. **Use of Forensic Evidence in Criminal Trials: Standards and Challenges**

    Aim: Evaluate how forensic evidence is handled (admissibility, reliability).

    Method: Review case law and forensic standards; interview forensic experts.

    Deliverable: Paper with best-practice guidelines for judges and lawyers.

12. **Right to Fair Trial and Pretrial Detention: Human Rights Perspective**

    Aim: Assess pretrial detention practices and alternatives.

    Method: Empirical analysis of detention durations using court records; doctrinal review.

    Deliverable: Policy brief proposing bail reform and alternative measures.

13. **Police Powers and Use of Force: Legal Framework and Accountability**

    Aim: Analyze laws regulating police use of force and oversight mechanisms.

Method: Case law review, policy documents, victims' reports.

Deliverable: Analytical report with proposed oversight mechanisms.

14. **Criminalization of Poverty: Laws, Practice, and Impact**

Aim: Explore how minor offenses disproportionately affect the poor.

Method: Data analysis of convictions for petty offenses; interviews with legal aid clinics.

Deliverable: Research paper with reform proposals.

15. **Cybercrime Laws: Effectiveness Against Evolving Threats**

Aim: Evaluate existing cybercrime statutes and enforcement challenges.

Method: Legal review, comparative analysis, interviews with cybersecurity professionals.

Deliverable: Paper with legislative amendments and capacity-building recommendations.

16. **Juvenile Justice Systems: Rehabilitation vs. Punishment**

Aim: Examine outcomes of juvenile justice approaches.

Method: Case studies, NGO reports, interviews with juvenile justice workers.

Deliverable: Comparative evaluation and a proposed juvenile diversion framework.

17. **Plea Bargaining: Legal Status and Effects on Justice Delivery**

Aim: Analyze plea bargaining's role and safeguards.

Method: Review statutes, case law, and court statistics; interview prosecutors and defence lawyers.

Deliverable: Balanced assessment and suggested procedural safeguards.

18. **Victim Rights and Restorative Justice Mechanisms**

Aim: Study how legal systems recognize and address victims' needs.

Method: Comparative doctrinal research and case studies of restorative programs.

Deliverable: Policy note recommending integration of restorative practices.

19. **Drug Policy and Criminal Law: Decriminalization Debates**

Aim: Examine legal, social, and health impacts of drug laws.

Method: Compare jurisdictions with different approaches; analyze health outcomes where data exists.

Deliverable: Research paper with policy recommendations.

20. **Forfeiture Laws and Property Rights: Balancing Crime Control and Justice**

Aim: Evaluate civil and criminal asset forfeiture laws.

Method: Case studies, legal analysis, interviews with affected parties.

Deliverable: Critical review proposing stronger property protections.

Civil Law, Contracts & Tort (21–30)

21. **Doctrine of Negligence: Modern Applications in Professional Liability**

    Aim: Study negligence standards in professional malpractice cases.

    Method: Case law analysis across professions (medical, legal, engineering).

    Deliverable: Overview with a model checklist for professional duty assessment.

22. **Consumer Protection Laws vs. E-Commerce: Emerging Issues**

    Aim: Analyze consumer rights in online transactions.

    Method: Review consumer statutes and e-commerce policies; test common consumer complaints.

    Deliverable: Practical guide for consumer claims and e-vendor obligations.

23. **Force Majeure and Contract Performance Post-Pandemic**

    Aim: Study the invocation of force majeure clauses and judicial responses.

    Method: Doctrinal review of contract disputes during/after COVID-19.

    Deliverable: Paper with model force majeure clause and drafting tips.

24. **Privacy in Civil Law: Remedies for Intrusion and Defamation**

    Aim: Examine civil remedies for privacy breaches and reputational harm.

    Method: Case law study and comparative remedies mapping.

    Deliverable: Practical guide for drafting privacy complaints.

25. **Landlord-Tenant Law: Balancing Rights in Urban Rental Markets**

    Aim: Assess regulation of rent control, eviction and tenant protections.

    Method: Statute review, case studies, interviews with tenant associations.

    Deliverable: Policy brief proposing a balanced rental law framework.

26. **Alternative Basis for Civil Liability: Strict Liability in Product Safety**

    Aim: Explore strict liability application in defective product cases.

    Method: Case law and statutory analysis; review recalls and regulatory responses.

    Deliverable: Paper with compliance checklist for manufacturers.

27. **Contract Interpretation and Boilerplate Clauses: Judicial Attitudes**

    Aim: Study how courts interpret standard-form contracts.

    Method: Analyze cases involving unconscionability, adhesion contracts.

    Deliverable: Annotated guide to drafting fair boilerplate clauses.

28. **Remedies in Civil Law: Injunctions and Equitable Relief**

Aim: Understand when courts grant equitable remedies.

Method: Comparative case law study and practical examples.

Deliverable: Flowchart and guide for remedy-seeking strategy.

29. **Inheritance and Succession Law: Challenges of Intergenerational Property**

Aim: Explore intestacy rules, wills, and contested succession disputes.

Method: Statutory and case law review; family interviews (if ethical).

Deliverable: Paper with model clauses for wills and succession planning tips.

30. **Compensation Frameworks for Mass Tort Incidents**

Aim: Analyze legal mechanisms for compensating large-scale harm (industrial accidents).

Method: Case studies of compensation schemes, class actions, and special tribunals.

Deliverable: Policy recommendations for fair and efficient compensation.

Corporate & Commercial Law (31–40)

31. **Corporate Governance: Board Duties and Shareholder Rights**

Aim: Study fiduciary duties, conflicts of interest, and governance reforms.

Method: Review corporate codes, case law, and governance failures.

Deliverable: Best-practices checklist for boards and a short guide for shareholders.

32. **Mergers & Acquisitions: Legal Due Diligence Checklist**

Aim: Create a detailed legal due diligence template for M&A transactions.

Method: Map required corporate, tax, employment, IP checks.

Deliverable: Comprehensive due diligence checklist and sample report.

33. **Competition Law: Market Abuse and Antitrust Enforcement**

Aim: Analyze cartel enforcement, abuse of dominance, and merger control.

Method: Case studies of major antitrust cases; statutory mapping.

Deliverable: Critical review and plain-language guide for small businesses.

34. **Corporate Social Responsibility (CSR) and Legal Obligations**

Aim: Study mandatory and voluntary CSR obligations and compliance mechanisms.

Method: Review company law provisions and CSR reports from

corporations.

Deliverable: Report with model CSR policy and compliance measures.

35. **Securities Regulation: Investor Protection and Disclosure**

Aim: Evaluate disclosure regimes and insider trading laws.

Method: Regulatory analysis and case studies of enforcement actions.

Deliverable: Paper plus a model investor-rights disclosure template.

36. **Start-up Law: Incorporation, Funding, and Founder Agreements**

Aim: Provide a legal roadmap for start-ups (choice of entity, funding rounds).

Method: Draft model documents (founder agreement, term sheet, shareholder agreement).

Deliverable: Starter pack of templates and an explanatory note.

37. **Cross-Border Commercial Contracts: Choice of Law and Jurisdiction**

Aim: Analyze clauses that determine governing law and dispute resolution.

Method: Comparative review of international arbitration vs court litigation.

Deliverable: Guide with model clauses and risk assessment.

38. **Corporate Insolvency and Rescue Mechanisms**

Aim: Study insolvency frameworks and mechanisms for corporate rescue.

Method: Compare bankruptcy procedures and restructuring options.

Deliverable: Policy paper on improving creditor-debtor balance.

39. **Banking Regulation: Consumer Finance and Compliance**

Aim: Examine borrower protection, interest regulation and bank compliance.

Method: Doctrinal research and review of enforcement cases.

Deliverable: Compliance checklist for lenders and a short regulatory overview.

40. **Tax Avoidance vs. Tax Evasion: Legal Doctrines and Enforcement**

Aim: Distinguish lawful tax planning from illegal evasion.

Method: Study key judicial tests and anti-abuse rules in tax law.

Deliverable: Educational guide for students and a case-applications section.

Family Law & Personal Law (41–50)

41. **Legal Framework for Child Custody: Best Interests Standard**

Aim: Analyze how courts apply the "best interests" test.

Method: Case law review and interviews with family lawyers or social

workers.

Deliverable: Flowchart for custody decision-making and recommended advocacy points.

42. **Domestic Violence Laws: Protection Orders and Enforcement Gaps**

Aim: Assess protection mechanisms and enforcement challenges.

Method: Statute review, case studies, interviews with NGOs.

Deliverable: Policy recommendations and a template protection-order application.

43. **Marriage Law and Recognition of Customary Unions**

Aim: Examine legal recognition of customary and religious marriages.

Method: Comparative analysis of statutory recognition and consequences for property/children.

Deliverable: Paper with reform proposals for inclusive marriage law.

44. **Surrogacy and Assisted Reproductive Technologies: Legal Issues**

Aim: Explore parentage, contractual, and ethical legal issues in ART.

Method: Doctrinal research, analysis of statutes regulating surrogacy.

Deliverable: Policy brief proposing clear regulatory safeguards.

45. **Adoption Laws: Process, Delays, and Rights of Biological Parents**

Aim: Study procedural bottlenecks and rights balancing.

Method: Case tracking, interviews with adoption agencies, statutory review.

Deliverable: Diagnostic report and proposed process improvements.

46. **Elder Law: Guardianship, Capacity, and Protection of Assets**

Aim: Explore legal mechanisms to protect elderly persons from abuse and financial exploitation.

Method: Statute and case study review; interviews with social services.

Deliverable: Toolkit for lawyers and social workers to assess capacity.

47. **Property Division on Divorce: Equitable Distribution vs. Community Property**

Aim: Compare approaches to dividing marital property.

Method: Comparative doctrinal analysis and sample calculations.

Deliverable: Guide illustrating outcomes under different systems.

48. **Prenuptial Agreements: Validity, Enforcement, and Public Policy**

Aim: Examine enforceability and drafting pitfalls of prenuptial agreements.

Method: Case law review and drafting checklist.

Deliverable: Model prenup with explanatory notes.

49. **Recognition of LGBT+ Families: Legal Rights and Protections**

    Aim: Assess recognition of same-sex relationships and parental rights.

    Method: Comparative legal study and analysis of recent progressive rulings.

    Deliverable: Policy paper with recommendations for inclusive reforms.

50. **Religious Arbitration in Family Matters: Legal Boundaries and Human Rights**

    Aim: Study private arbitration based on religious law and its interaction with statutory rights.

    Method: Case studies, doctrinal analysis, interviews with stakeholders.

    Deliverable: Critical analysis and a framework for safeguarding fundamental rights.

Intellectual Property & Cyber Law (51–60)

51. **Copyright and Education: Fair Use in the Digital Classroom**

    Aim: Clarify rules for using copyrighted works in educational settings.

    Method: Statutory analysis, case law, and sample licensing models.

    Deliverable: Practical guide for teachers and institutions.

52. **Patentability of Software and Business Methods**

    Aim: Study legal tests for patent eligibility of software-related inventions.

    Method: Case law analysis across jurisdictions and drafting of sample patent claims.

    Deliverable: Comparative paper and patent-drafting checklist.

53. **Trademark Law and Brand Protection for SMEs**

    Aim: Provide guidelines for small and medium enterprises to protect branding.

    Method: Practical walkthrough of registration, enforcement, and anti-counterfeiting actions.

    Deliverable: Step-by-step manual with sample cease-and-desist template.

54. **Data Protection Law: Compliance and Rights of Data Subjects**

    Aim: Map obligations under modern data-protection frameworks and remedies for breaches.

    Method: Statute review (e.g., PDPAs), sample privacy policy drafting, and breach response plan.

    Deliverable: Compliance checklist and model privacy policy.

55. **Domain Name Disputes and UDRP Proceedings**

    Aim: Analyze the Uniform Domain-Name Dispute-Resolution Policy (UDRP) approach.

    Method: Review notable UDRP decisions; draft a mock complaint and response.

    Deliverable: Case study and procedural manual.

56. **Open Source Licensing: Legal Implications for Developers**

    Aim: Explain obligations and compatibilities of common open-source licenses.

    Method: License comparison and hypothetical scenarios illustrating obligations.

    Deliverable: Student-friendly primer and decision-tree for license choice.

57. **Content Moderation and Platform Liability**

    Aim: Study legal obligations of online platforms regarding user content.

    Method: Comparative statutory analysis and major litigation examples.

    Deliverable: Policy brief proposing content-moderation balances.

58. **Digital Evidence and Chain of Custody in Cyber Investigations**

    Aim: Examine admissibility and preservation of digital evidence.

    Method: Technical and legal analysis with sample chain-of-custody forms.

    Deliverable: Guide for investigators and lawyers.

59. **Biometric Data Regulation and Privacy Concerns**

    Aim: Investigate legal frameworks for collection and use of biometric identifiers.

    Method: Statutory review and risk assessment of biometric deployments.

    Deliverable: Policy recommendations for safe use.

60. **Artificial Intelligence and IP Ownership: Who Owns Machine-Created Works?**

    Aim: Explore legal challenges around AI-generated inventions and creative works.

    Method: Doctrinal analysis and hypothetical case drafting.

    Deliverable: Position paper with suggested legislative language.

International Law & Human Rights (61–70)

61. **Refugee Law and Asylum Procedures: Gaps Between Principle and Practice**

Aim: Evaluate asylum adjudication and access to protection.

Method: Case studies, UN convention analysis, interviews with NGOs.

Deliverable: Reform paper with procedural safeguards.

62. **International Criminal Law: Prosecution of Core International Crimes**

Aim: Study jurisdiction, complementarity, and enforcement of international criminal law.

Method: Review ICC cases and domestic prosecutions for crimes against humanity.

Deliverable: Analytical essay with jurisdictional charts.

63. **Human Rights Impact Assessment of Development Projects**

Aim: Create a template to assess human rights implications of infrastructure projects.

Method: Field-based case example (if feasible) or desk study of an existing project.

Deliverable: HRA template and completed sample assessment.

64. **Trade Law and Public Health: TRIPS Flexibilities and Access to Medicines**

Aim: Analyze IP vs public health balance in international trade law.

Method: Study TRIPS provisions, compulsory licensing cases, and country examples.

Deliverable: Policy brief for optimizing access within trade rules.

65. **Law of the Sea: Maritime Boundaries and Resource Rights**

Aim: Study disputes over maritime delimitation and resource exploitation.

Method: Examine UNCLOS provisions and arbitration decisions.

Deliverable: Case study analysis with maps and legal reasoning.

66. **Climate Change Litigation: Holding States and Corporations Accountable**

Aim: Map emerging climate-related litigation strategies.

Method: Review recent landmark cases and legal theories used by litigants.

Deliverable: Survey paper and litigation toolkit.

67. **International Investment Law: ISDS and Sovereign Rights**

Aim: Explore investor-state dispute settlement mechanisms and reforms.

Method: Analyze treaty texts, arbitration awards, and reform proposals.

Deliverable: Critical analysis and suggested treaty language.

68. **Human Trafficking: Legal Frameworks and Prosecution Challenges**

Aim: Assess anti-trafficking laws and victim-protection measures.

Method: Case studies and NGO interviews; evaluate victim support

frameworks.

Deliverable: Report with prosecution and protection improvements.

69. **Diplomatic Immunity: Scope, Abuse, and Limits**

Aim: Study legal basis and limits for diplomatic immunity.

Method: Review Vienna Convention provisions and prominent abuse cases.

Deliverable: Analytical brief and recommendations for accountability.

70. **Cultural Property Law: Protection Against Illicit Trafficking**

Aim: Study laws protecting cultural heritage and international cooperation to prevent trafficking.

Method: Analyze conventions (e.g., UNESCO), case studies of restitutions.

Deliverable: Policy paper with model repatriation procedure.

Environmental, Land & Resource Law (71–80)

71. **Environmental Impact Assessment (EIA): Legal Requirements and Enforcement**

Aim: Examine the EIA legal framework and common compliance gaps.

Method: Compare statutory EIA requirements and review sample EIAs.

Deliverable: Checklist for stronger EIA practice and enforcement.

72. **Water Rights and Allocation Law: Conflicts and Solutions**

Aim: Map legal regimes governing water allocation and dispute mechanisms.

Method: Case studies of river-basin conflicts; statutory analysis.

Deliverable: Policy recommendations for equitable water sharing.

73. **Wildlife Protection Laws: Effectiveness of Conservation Litigation**

Aim: Evaluate legal strategies used to protect endangered species.

Method: Review litigation successes and failures, conservation statutes.

Deliverable: Strategic litigation playbook and critique of enforcement gaps.

74. **Land Use Planning and Zoning: Legal Controls and Community Participation**

Aim: Analyze how zoning laws shape development and the role of public participation.

Method: Case study of a municipal plan; statutory review and stakeholder interviews.

Deliverable: Model public-participation protocol and critique of zoning processes.

75. **Climate Adaptation Law: Legal Instruments for Community Resilience**

Aim: Study laws enabling local adaptation to climate impacts.

Method: Review municipal and national adaptation statutes and programs.

Deliverable: Toolkit for drafting local adaptation ordinances.

76. **Pollution Liability and Compensation Mechanisms**

Aim: Examine legal regimes for holding polluters accountable and compensating victims.

Method: Case studies of industrial spills and remediation law.

Deliverable: Policy paper with liability models and compensation frameworks.

77. **Renewable Energy Law: Regulatory Pathways and Obstacles**

Aim: Analyze legal and regulatory barriers to renewable deployment.

Method: Statutory review, regulatory incentives, and case studies of projects.

Deliverable: Regulatory reform proposals to accelerate renewables.

78. **Forest Law and Indigenous Land Rights**

Aim: Explore legal protection for indigenous land tenure in forested areas.

Method: Doctrinal analysis and case studies of land claims.

Deliverable: Report with recommendations for legal recognition and coexistence.

79. **Soil and Agricultural Law: Land Tenure, Tenancy and Food Security**

Aim: Study legal frameworks that affect smallholder farmers and food systems.

Method: Statute review, case studies, and NGO reports.

Deliverable: Policy briefing aimed at protecting smallholder rights.

80. **Environmental Courts and Tribunals: Specialized Adjudication Models**

Aim: Evaluate the effectiveness of specialized environmental adjudicatory bodies.

Method: Comparative study of tribunal designs and outcomes.

Deliverable: Recommendations for tribunal design and jurisdiction.

Alternative Dispute Resolution & Legal Practice (81–90)

81. **Arbitration Clause Drafting: Ensuring Enforceability**

Aim: Produce model clauses for different types of contracts and disputes.

Method: Drafting exercise with commentary on seat, governing law, and

emergency relief.

Deliverable: Annotated set of arbitration clauses and drafting notes.

82. **Mediation in Commercial Disputes: Success Factors and Drafting Settlement Agreements**

Aim: Study best practices for mediation and enforceable settlements.

Method: Interview mediators, analyze settlement agreement templates.

Deliverable: Practical mediator's checklist and model settlement.

83. **Courtroom Advocacy: Preparing a Trial Brief and Oral Argument**

Aim: Create a step-by-step guide to preparing persuasive trial submissions.

Method: Draft a model trial brief on a hypothetical case and prepare oral argument notes.

Deliverable: Written brief and recorded or live mock oral.

84. **Class Actions and Collective Redress: Procedure and Strategy**

Aim: Analyze thresholds for certification and management of class actions.

Method: Case law review and procedural mapping.

Deliverable: Draft class-action claim and litigation plan.

85. **Legal Ethics and Professional Responsibility: Conflict of Interest Scenarios**

Aim: Identify common ethical dilemmas and propose handling strategies.

Method: Use hypothetical scenarios and analyze applicable rules of professional conduct.

Deliverable: Ethical decision-making flowchart and memo.

86. **Legal Aid Clinics: Designing a Community Legal Outreach Program**

Aim: Create a model legal-aid clinic to address local legal needs.

Method: Needs assessment, stakeholder consultation, and operational design.

Deliverable: Clinic operational manual and intake forms.

87. **Judicial Reasoning: Writing Judgments for Clarity and Persuasiveness**

Aim: Study elements of well-reasoned judgments and practice drafting.

Method: Analytical reading of exemplary judgments and drafting exercises.

Deliverable: Model judgment with commentary.

88. **Alternative Courts: Online Dispute Resolution (ODR) Platforms**

Aim: Explore legal and technical design of ODR systems for small claims.

Method: Analyze existing platforms and draft procedural rules.

Deliverable: ODR procedural design and user guide.

89. **Evidence Law Reforms: Modernizing Rules for Scientific and Digital Evidence**

Aim: Propose reforms to evidence law to handle scientific and digital evidence.

Method: Comparative analysis and expert interviews.

Deliverable: Reform proposal with draft statutory language.

90. **Legal Project Management: Tools for Efficient Litigation and Transactions**

Aim: Introduce project-management techniques to legal teams.

Method: Case study implementing project-management tools in a mock file.

Deliverable: Project plan template and post-mortem evaluation.

Legal Technology, Policy Reform & Experimental Ideas (91–100)

91. **Legal Tech Adoption in Small Firms: Barriers and Solutions**

Aim: Examine technology uptake in small legal practices and propose interventions.

Method: Survey small firms, analyze costs and benefits.

Deliverable: Report with implementation roadmap and low-cost tech options.

92. **Algorithmic Decision-Making and Due Process: Auditing for Fairness**

Aim: Study legal standards for using algorithms in public decision-making (benefits, welfare).

Method: Case studies of automated systems; propose an audit framework.

Deliverable: Audit checklist and policy recommendations.

93. **Blockchain and Smart Contracts: Enforceability and Legal Challenges**

Aim: Analyze whether and how smart contracts can be enforced in courts.

Method: Legal doctrine review and drafting of sample smart-contract disputes.

Deliverable: Paper and model smart-contract clauses with fallback legal provisions.

94. **Law Reform Proposal: Drafting a Model Bill on [Pick a Topic]**

Aim: Draft a concise model bill on a current issue (e.g., data protection, environmental liability).

Method: Research existing laws, stakeholder needs, and drafting best

practices.

Deliverable: Fully annotated model bill and explanatory memorandum.

95. **Access to Justice Metrics: Designing an Evaluation Framework**

Aim: Create measurable indicators to assess access to justice in a locality.

Method: Literature review and pilot data collection.

Deliverable: Metric framework and pilot report.

96. **Pro Bono Culture in Law Schools: Building Sustainable Programs**

Aim: Propose a structure for mandatory or voluntary pro bono programs.

Method: Survey successful models and stakeholder interviews.

Deliverable: Implementation guide for law schools.

97. **Legal Information Design: Making Statutes Readable for the Public**

Aim: Re-draft complex statutory provisions into accessible language and structure.

Method: Select example statutes and apply plain-language principles.

Deliverable: Before-and-after statute drafts with readability analysis.

98. **Empirical Legal Studies: Designing a Survey on Public Knowledge of Rights**

Aim: Measure public awareness of a specific legal right (e.g., tenant rights, consumer rights).

Method: Design questionnaire, pilot test, analyze results.

Deliverable: Dataset, analysis, and policy suggestions for education.

99. **National Human Rights Institution (NHRI) Performance Review**

Aim: Evaluate an NHRI's effectiveness using international standards (Paris Principles).

Method: Document analysis, stakeholder interviews, and performance indicators.

Deliverable: Evaluation report and improvement plan.

100. **Hybrid Legal Clinics: Integrating Law Students with Technology for Remote Legal Aid**

Aim: Design a hybrid clinic delivering remote legal services supported by technology.

Method: Operational design, workflow mapping, and pilot user-testing.

Deliverable: Clinic blueprint, intake forms, and training module for students.

Must Read: 150 Ready-to-use Topics – Policy Project Ideas

Final tips for turning an idea into a strong project

- **Start with a focused research question.** Narrow is better than broad. Example: "How have courts in [Country] applied force majeure clauses in COVID-19 contract disputes?" is clearer than "Force majeure and the pandemic."
- **Create a clear structure.** Typical sections: introduction (with research question), literature/legislative review, methodology, analysis, conclusions, and recommendations.
- **Be methodical with sources.** Use statutes, leading cases, academic articles, government reports, and reputable NGO publications. Always cite properly.
- **Document your methodology.** For empirical work, explain sampling, instruments, consent, and limitations.
- **Include practical deliverables.** If your project proposes reforms or templates (model laws, clauses, checklists), include annotated drafts.
- **Proof and format for submission.** Keep headings, subheadings, and a bibliography. Use consistent citation style required by your faculty.
Conclusion

This list of **100 law project ideas** is crafted for students who want grounded, practical, and academically sound topics. Each entry supplies a clear aim, straightforward methods, and suggested deliverables so you can begin work immediately.

Whether you prefer doctrinal research, empirical studies, drafting model legislation, clinic-based work, or innovative legal-technology projects, there is an idea here that you can adapt to your interests and timeline.

If you'd like, I can help you select the best topic based on your course level (undergraduate, LL.M., or research degree), suggest a research question for one of the ideas, or draft an annotated outline or sample bibliography for any chosen topic.
